

Associate of Science in Legal Studies

The Associate of Science in Legal Studies offers a foundation in legal doctrine, along with the analytical, technical, and communication skills often required in the legal field. This associate degree program will aid you in doing your part to help solve aspects of the complex societal challenges associated with the public’s ability to access justice by providing a foundation for those interested in nonlawyer paraprofessional fields, such as paralegal, legal assistant, legal analyst or technician. By equipping you for ethical service and leadership, the knowledge gained from this online program is applicable to many industries seeking individuals with legal expertise, such as law firms, government agencies, nonprofits, and corporations or businesses with legal departments.

Degree Program Objectives

In addition to the institutional and degree level learning objectives, graduates of this program are expected to achieve these learning outcomes:

- Apply legal research and writing skills in realistic legal contexts.
- Develop critical thinking and legal analytical skills.
- Demonstrate proficiency with law office equipment and software.
