

# Bachelor of Applied Science in Technical Management

The Bachelor of Applied Science in Technical Management is designed to build upon your prior education and work experience gained through your community college or military technical courses/occupations. Completion of this program provides the maximum opportunity for you to leverage your experience into a degree that will prepare you for management and supervisory roles. This program explores management theories, concepts, and practices necessary to organize, motivate, and lead human capital. In addition, while pursuing this BAS degree program, you may be eligible to receive the AAS in technical management as well as a certificate in technical management.<sup>1</sup>

## Degree Program Objectives

In addition to the institutional and degree level learning objectives, graduates of this program are expected to achieve these learning outcomes:

- Conduct business problem focused management research, including collection and analysis of data, and communication of findings by using qualitative and quantitative research methods.
- Develop and foster critical thinking, analysis, planning, and communication skills.
- Examine complex organizational issues that include staffing, budgeting, strategic management, quality control, project management, supply chain management, marketing management, information systems, production and operations.
- Demonstrate a proficiency in identifying and solving problems related to the specialty area using Technical Management, Project Management, Technical Research Management, Management Information Systems, and Transportation Security Management.
- Develop an analytical framework using a variety of approaches to apply leadership and management theory and practice to address the challenges of global organizations in this century.
- Evaluate technical management issues in the context of ethical, technological, structural, cultural, human and environmental factors.

<sup>1</sup> Students enrolled in the Bachelor of Applied Science in Technical Management program will have to apply for the awarding of the Associates of Applied Science in Technical Management and/or Certificate in Technical Management.

Total Semester Hours		27

Students must choose a concentration for this degree program and may select from a Concentration in Logistics and Supply Chain Management, Concentration in Management of Information Systems, Concentration in Project Management, Concentration in Technical Management, or Concentration in Technical Resource Management.

## Concentration in Logistics and Supply Chain Management (15 semester hours)

The concentration in Logistics and Supply Chain Management introduces the student to the common logistical and supply chain management functions in an enterprise. Students will learn about a broad range of topics including logistics, demand, risk, and supply chain management.

### Objectives

Upon successful completion of this concentration, the student will be able to:

- Evaluate the practices and processes required for successful logistics management.
- Develop strategic planning skills, using a broad range of logistics and supply change management tools, to solve complex business problems.
- Analyze the critical role supply chain and logistics management play within organizations.

### Concentration Requirements (15 semester hours)

Code	Title	Semester Hours
SCMG301	Supply Chain Risk Management	3
SCMG305	Global Demand Management	3
TLMT313	Supply Chain Management	3
TLMT341	Logistics Management	3
TLMT441	Advanced Business Logistics	3
Total Semester Hours		15

## Concentration in Management of Information Systems (15 semester hours)

The management of information systems concentration introduces the student to the common database management systems used in business and management. Students will study the common management information systems (MIS) architecture, databases, local area networks, and network security. Students will focus on management research, including collection and analysis of data, and communication of findings by using qualitative and quantitative research methods.

### Objectives

Upon successful completion of this concentration, the student will be able to:

- Evaluate the most common management information systems.
- Develop a broad working knowledge of the most common local area networks, management information systems, and database systems.
- Analyze network and security threats.

### Concentration Requirements (15 semester hours)

Code	Title	Semester Hours
BUSN350	Analytics II	3
INFO331	Management Information Systems	3
INFO222	Database Concepts	3
ISSC231	Networking Concepts	3
ISSC422	Information Security	3
Total Semester Hours		15

## Concentration in Project Management (15 semester hours)

The project management concentration prepares the student to identify and solve technical management projects that rely upon systems and technology in the fast-changing business and management environments. The students will focus on project management, budget development, management information systems, Microsoft Project manager applications, and organizational behavior.

### Objectives

Upon successful completion of this concentration, the student will be able to:

- Evaluate the practices and processes required to be a successful technical management project manager.
- Develop strategic planning skills, using a broad range of technical management tools, to solve complex project problems.
- Analyze the critical role project manager's play in the technical management workplace.

### Concentration Requirements (15 semester hours)

Code	Title	Semester Hours
BUSN333	Project Management for Business Analysts	3
FINC405	Budget Development and Execution	3
INFO331	Management Information Systems	3
ITMG322	Project Management Using MS Project	3
MGMT311	Organizational Behavior	3
Total Semester Hours		15

### Concentration in Technical Management (15 semester hours)

The technical management concentration introduces the student to the systematic approach to solving complex business and management problems. Students will focus on management research, including collection and analysis of data, and communication of findings by using qualitative and quantitative research methods.

#### Objectives

Upon successful completion of this concentration, the student will be able to:

- Evaluate technical management systems.
- Develop a broad knowledge of technical management.
- Analyze technical management/business management problems.

### Concentration Requirements (15 semester hours)

Code	Title	Semester Hours
FINC400	Principles of Financial Management	3
INFO331	Management Information Systems	3
ITMG322	Project Management Using MS Project	3
MGMT410	Strategic Management	3
TLMT313	Supply Chain Management	3
Total Semester Hours		15

### Concentration in Technical Resource Management (15 semester hours)

The technical resource management concentration introduces the student to the systematic approaches to solving technical systems problems. Students will learn to identify cost-savings, logical approaches to dealing with increasing business and management resource demands. Students will also focus on business critical thinking strategies, financial management, budget development, and human resource development.

#### Objectives

Upon successful completion of this concentration, the student will be able to:

- Evaluate organizational technical management problems.
- Develop proficiency in handling complex technical development concepts, to include the latest computer software tools and technologies.
- Analyze project scheduling and resource management functions.

### Concentration Requirements (15 semester hours)

Code	Title	Semester Hours
BUSN333	Project Management for Business Analysts	3
BUSN410	Critical Thinking Strategies for Business Decisions	3
FINC400	Principles of Financial Management	3
FINC405	Budget Development and Execution	3
HRMT407	Human Resource Management	3
Total Semester Hours		15

### Final Program Requirements (3 semester hours)

Code	Title	Semester Hours
MGMT495	Senior Seminar in Management (to be taken as the last course before graduation) <sup>1</sup>	3
Total Semester Hours		3

<sup>1</sup> Prerequisite: Senior Standing and completion of all major courses prior to enrollment.

## **Elective Requirements (45 semester hours)**

Select any courses that have not been used to fulfill major requirements.  
Credits applied toward a minor or certificate in an unrelated field may  
be used to fulfill elective credit for the major.
