

Undergraduate Certificate - Pre-Health

The Pre-Health Certificate provides a foundation for students who are interested in the healthcare field. General Education courses in the humanities, sciences, and mathematics provide a strong foundation for further studies in allied healthcare fields. The curriculum is composed of classroom and laboratory experiences that serve as admission and prerequisite requirements in most nursing and other healthcare-related degree programs.

Certificate Objectives

Upon successful completion of this certificate, the student will be able to:

- Form strong academic habits and skills required to enter healthcare related academic programs
- Establish a strong foundation in the arts and sciences
- Prepare for advanced study in nursing and other related healthcare fields
