

Learning Track in Geospatial Intelligence

The undergraduate learning track in Geospatial Intelligence is a three-course program involving the study of geospatial information systems, applied geospatial intelligence, and geographic information systems. It is designed for students who wish to advance their knowledge without committing to a degree or certificate program.

Learning Track Requirements (9 semester hours)

Code	Title	Semester Hours
GEOG200	Fundamentals of Geographic Information Systems I	3
INTL419	Applied Geospatial Intelligence	3
INTL432	Geographic Information Systems I	3
Total Semester Hours		9
